PROGRAMME OUTCOMES

BA / BSc / BCom/BCA/BBA - Program Outcomes

On completion of undergraduate programme, the student is expected to achieve the following programme outcomes

- **P01: Critical Thinking and Analytical Reasoning**

Utilize logical reasoning and critical thinking skills gained from classroom and lab courses in real-world scenarios.

- **P02: Communication Skills**

Refine communication skills through seminars, project presentations, and classroom activities to apply them effectively in practical settings, fostering meaningful interactions with individuals, organizations, and government entities.

- **P03: Problem Solving**

Apply acquired knowledge, logic, skills, and attitudes from informed learning to assess and resolve everyday problems effectively.

- **P04: Computational and Observational Skill**

Apply a data-driven approach to classify, analyze, and interpret data using computing technology tools to develop practical solutions and demonstrate observational skills in real-life scenarios.

- **P05: Technological Competence**

Use relevant technologies effectively in their field of study and professional practice and stay current with technological advancements and their implications.

- **PO6: Personal development and social responsibility**

Develop self-awareness, self-discipline, and the ability to manage time and resources effectively and recognize the importance of social responsibility and contribute positively to society.
